To Use Your Pediatrician Instead of a Drugstore Clinic

REASONS

We believe in the medical home. Your doctors know you and your family. We have a committed partnership with you.

Your provider will coordinate your care with specialists and therapists whom we know. These specialists will communicate with us to help guide the care your child needs and to help you through a very complicated health care system.

We are constantly working to make our office more accessible with less wait time. **We are open 7 days a week!**

We are committed to use all our community resources that are available in order to achieve the best quality of care for your child.

We take the opportunities at each regular office visit to address other issues of concern to the family such as special needs, chronic illnesses, obesity, immunization catch up, mental health issues and other concerns. This comprehensive approach strengthens the relationship we have with our families and is lacking in drugstore clinics.

Retail clinics provide no follow up and reduce our ability to thoroughly assess the full health picture of your child.

We maintain comprehensive medical records that include specific care plans. We make these records available to all providers and specialists who are involved in your child's care.

We are your child's advocate!

We offer a continuum of health care that is focused, collaborative, and continuous.

Crown Colony Pediatrics

500 Congress Street, Suite 1F
