VACCINE POLICY

Crown Colony Pediatrics does not accept patients who do not vaccinate.

We follow the recommendations of the American Academy of Pediatrics with regards to scheduling well child visits and immunizations. If you have any reservations regarding immunizations, you should speak to one of the doctors before scheduling an appointment.

We believe strongly in the effectiveness of vaccines to prevent serious illness and to save lives.

We believe strongly in the safety of our vaccines.

We believe strongly, based on all available literature, evidence and current studies, that vaccines do not cause autism or other developmental disabilities. Vaccinating children may be the single most important health promoting intervention we perform as health care providers. When you choose not to vaccinate, you are putting your child and our other families and children at risk.

For more information on vaccinations please refer to the American Academy of Pediatrics and Center for Disease Control websites.
